

Audio/Visual Distribution Cabling

HDMI Standards

HDMI 2.1 supports 8K resolution at 60 Hz and 4K at 120 Hz. The maximum reliable passive HDMI 2.1 cable length is 3 metres for Ultra High Speed certification. Beyond 3 metres, active optical HDMI (AOC) or fibre extenders are required.

- HDMI 2.1: 8K@60 Hz, 4K@120 Hz
- Passive limit: 3 m

HDBaseT

HDBaseT transmits uncompressed HDMI, Ethernet, RS-232, and IR over a single Cat 6A cable. The maximum distance for HDBaseT is 100 metres. HDBaseT 3.0 supports 4K@60 Hz 4:4:4 with zero latency.

- HDBaseT max distance: 100 m
- HDBaseT 3.0: 4K@60 Hz 4:4:4, zero latency

Digital Signage

A typical digital signage network uses H.265-encoded content delivered over IP multicast. A 4K signage player requires a 25 Mbps sustained stream to avoid macro-blocking during high-motion content.
